```
package Overriding;
public class A {
    int i,j;
    A (int a, int b){
        i=a;
        j=b;
    }
    void show () {
        System.out.println("i and j :"+i+" "+j);
    }
}

class B extends A{
    int k;
    B(int a, int b, int c){
        super(a,b);
        k=c;
    }
    void show() {
        System.out.println("k: "+k);
    }
}

class Override{
    public static void main(String[] args) {
        B ob= new B(1, 2, 3);
        ob.show();
    }
}
```
